AI SYSTEM ANALYSIS

"THIS MANIFEST INDICATES A COMPREHENSIVE OVERHAUL OF A **CATERPILLAR C7/C9 HEUI FUEL INJECTION SYSTEM**, LIKELY NECESSITATED BY A HIGH-PRESSURE PUMP FAILURE. CRITICAL OMISSIONS INCLUDE THE **INJECTION ACTUATION PRESSURE (IAP) SENSOR** AND FRESH FUEL/OIL FILTERS, WHICH ARE MANDATORY REPLACEMENTS TO ENSURE THE NEW ECM AND HARNESS RECEIVE ACCURATE DATA AND CLEAN FLUID. I STRONGLY RECOMMEND FLUSHING THE HIGH-PRESSURE OIL RAIL AND FUEL TANK PRIOR TO INSTALLATION TO ENSURE METAL DEBRIS FROM THE FAILED PUMP DOES NOT IMMEDIATELY COMPROMISE THE NEW INJECTORS."
